

Glink Software & Services
CREATING THINGS FOR ALL YOUR NEEDS

PROFILE

G-Link is a growing software company with the focus in the areas like Web Development, Software Development, Business Promotion through web, Graphics and Animation, BPO, ERP and all major kinds of IT enabled services. G-Link launched many clients' information portal and Business Applications. G-link is a software Development firm specializing in providing custom business Applications to customers through out the world. At Glink we have three basic philosophies, which drive our business efforts.

G-Link major objective is "do the right things for our customers" and we produce products with 100 % customer inputs, feedback and expects to deliver with 100 % customer satisfaction. Together we work with the business community as well as the technical staff to understand the current business needs and how best they can be addressed. We work in partnership with the business so that we can layout strategies and propose alternatives that help our customers accomplish their goals. We do this because customer satisfaction is the most important factor in how we measure our success

G-Link does the best work we possibly can. Our motto at Glink is "Quality in Computing" and we take it seriously. We believe that true craftsmanship can be extended into today's technology workplace. We take pride in the work we do for our customers. That pride pushes us to provide the best solutions and the best service that we can possibly deliver

G-Link focus in "Completing the Task" on time and prompt after sales service. Our company was founded because we realized that working, as a link inside our own company and with our customers is a big factor in the success of the projects that we work on. It is evident in any workplace, when a group of people works together well, the work gets done. This is especially true in the information technology area where communication and a friendly environment are as important as technical ability. Providing technical skill is a must but at Glink we also bring a history of friendship, honesty, and integrity to the projects we participate in.

At Glink we are committed to our customers. Our success directly relates to our ability to provide quality business solutions that work hard for our customers. We achieve more than other companies because we take pride in the work that we do and we work as a team. We believe that it is the combination of the above objectives - doing the right things for our customers, craftsmanship, and Glink work - that makes Glink the right choice for solving your business problems.
